Requirement Analysis:

Project Title

Student Hub Portal

Purpose

The Student Hub Portal is a web-based application designed to provide students with a single platform to access academic information, communicate with the institution, and manage their activities efficiently.

Functional Requirements

1. Home

Display welcome message.

Provide navigation to all pages.

Show latest announcements or highlights.

2. Login

Students can log in using their username and password.

Validate user credentials.

Redirect users to the dashboard after successful login.

3. Register

Allow new students to create an account.

Collect student details (Name, Email, Enrollment Number, Password, etc.).

Validate input data before registration.

4. Dashboard

The dashboard provides quick access to all student services.

Profile

View personal information.

Update profile details.

Change password.

Attendance

View attendance subject-wise.

Display attendance percentage.

Materials

Download study materials.

View uploaded notes and documents.

Results

View semester-wise examination results.

Display marks and grades.

Notifications

Display important notices and announcements.

Show latest updates from the college.

Calendar

Display academic calendar.

Show examination dates and event schedules.

Events

Display upcoming college events.

Show event details and registration information.

Feedback

Allow students to submit feedback.

Store feedback for administrator review.

5. About

Display information about the Student Hub Portal.

Explain the purpose and objectives of the system.

6. Contact

Display college contact information.

Provide a contact form for student queries.

7. Logout

End the current user session.

Redirect the user to the Home page.

Non-Functional Requirements

Performance

The website should load quickly.

Dashboard pages should open within a few seconds.

Security

User authentication through secure login.

Passwords should be protected.

Only authorized users can access student data.

Usability

Simple and user-friendly interface.

Easy navigation between pages.

Responsive design for desktop and mobile devices.

Reliability

The system should be available whenever students need it.

Data should be stored safely.

Maintainability

The system should be easy to update and maintain.

New modules can be added in the future.

Software Requirements

Operating System: Windows 10/11

Frontend: HTML, CSS, JavaScript

Backend: PHP (or any server-side language)

Database: MySQL

Browser: Google Chrome, Microsoft Edge, Mozilla Firefox

IDE: Visual Studio Code

Hardware Requirements

Processor: Intel Core i3 or above

RAM: Minimum 4 GB

Storage: 500 MB free space

Internet Connection

Keyboard and Mouse

User Requirements

Student

Register and log in.

View profile.

Check attendance.

Download study materials.

View results.

Read notifications.

View academic calendar.

Check upcoming events.

Submit feedback.

Log out securely.
